

## Curricular Practical Training (CPT): List of Required Internships and CPT Courses for Optional Internships

You are advised to first review [CPT for F-1 Students](#) information at the International Center web site.

There are two types of Curriculum Practical Training (CPT). Some academic programs have an internship requirement while some offer an optional course for a non-required internship. List A below shows the academic programs that have an official internship/practicum requirement. List B contains the programs that have an optional CPT course offered to facilitate participation in an internship/practicum. Students with an optional internship are required to enroll for the CPT course to comply with CPT requirements. Students are advised to consult with their respective schools/departments regarding specific requirements for courses and internships.
