CDC and U-M requirements for International Travelers to Campus

U-M follows CDC (Centers for Disease Control and Prevention [1]) guidelines. These guidelines for travelers arriving from international locations now include these requirements:

- Get a COVID-19 test within three calendar days before traveling to the US (or provide evidence of having recovered from COVID-19 within 90 days). See here [2] for more information.
- **Stay at home (quarantine) for 7 days after arrival** [5]. Your accommodations must meet the following U-M quarantine requirements [6].
  - You have access to your own closed-door bedroom.
  - You have access to your own bathroom or share a bathroom with 1-2 others and can clean and disinfect the space after every use.
  - You can articulate a plan with your housemates about cleaning, disinfecting and avoiding shared time in common spaces, such as a kitchen.

More information about these requirements is posted on the U-M Campus Maize and Blueprint website [5].
