Yuval Katz
*Pursuing PhD in Communication Studies*

Monica Jambu
*Pursuing Masters in Civil Engineering*
Schmoozing with your professor:

H-hey Dr. Smith.

I'm going to the lab after this.

Good.

Reflect on your culture

In your home country:

- What is the appropriate relationship between a student and an advisor? Share one of your past experiences.
- More generally, what is the appropriate relationship between professors and students? How do you approach your professors? Do you feel comfortable speaking in class?
PHW, THAT WAS CLOSE.

THAT'S IT. NO MORE FOOLING AROUND.

I AM GOING TO CATCH UP ON RESEARCH THIS WEEK AND SHOW PROF. SMITH I AM NOT A SLACKER!

ONE WEEK LATER:

I'M MEETING PROF. SMITH IN FIVE MINUTES...

AND I HAVE NOTHING TO SHOW!
Seeking out an advisor

PhD level:
- Usually preassigned, BUT more mentors needed (committee)
- Try making connections through classes/labs

Masters level:
- Two types of advisors- Research advisor and academic advisor (sometimes can be the same person)
- Academic advisors usually assigned, free to change
- You choose your Research advisor as per your area of interest, often not a prerequisite for your degree
How Well Do You Know Your Advisor?
Take the quiz!

1. Where did your advisor go for undergrad? (1 pt.)
2. Where is your advisor's home town? (1 pt.)
3. Who was your advisor's advisor (your grandadvisor)? (1 pt.)
4. How many siblings does he/she have, and what are their professions? (1 pt.)
5. What is your advisor's middle name? (1 pt.)

Your Score:

4-5 - You know WAY too much about your Advisor.
2-3 - You Google-stalked him, didn’t you?
0-1 - You have a normal relationship with your Advisor.

An appropriate relationship

- No right answer!
- Be formal at the beginning, more personable later
- See your advisor as a human being - but be professional
- U-M policy banning any relationship between GSI/undergrad student or graduate student and faculty
- Always set an appointment and be prepared for an effective meeting / have an agenda
- Respect their schedule
NINJAS vs PROFESSORS
A COMPARATIVE ANALYSIS

NINJAS
Experts in methods of subterfuge
Employ a assortment of lethal weapons
Can kill you without remorse
Always shown wearing the same outfit
Wears a hood
Hurls Shurikens
People think they’re pretty cool
Shrouded in mystery

PROFESSORS
Experts in methods no longer used
Employ a bunch of lazy peons (you)
Can kill your career or worse
Always wears the same outfit
Wears a hood at graduation
Hurls when you present your research
They think they’re pretty cool
Shrouds you in misery

Communicating with your advisor

PhD level:
- Conferences
- Face-to-face
- Co-writing
- Emails
- No communication (what should I do?)

Masters level:

Research advisor:
- Weekly meeting
- Email appointments
- Career advice (eg: pursuing PhD etc)

Academic advisor:
- Meet for getting job references, advice on course selection, CPT/OPT document signatures etc.
- Discuss personal issues
AVERAGE TIME SPENT COMPOSING ONE E-MAIL

PROFESSORS: 1.3 SECONDS

YES.
(SEND)

DO IT.

GRAD STUDENTS: 1.3 DAYS

DEAR (?) PROF. SMITH,

I was wondering if perhaps you might have possibly gotten the chance to potentially find the time to maybe look at the draft paper that I sent (I am attaching it in just in case). I also wonder if you have any question. Whatever you don't hesitate to.

Hello Prof Spence,

I am Monica, an International student from India. I am admitted into the MSE in Civil Engineering program this Fall. I would be specializing in Structural Engineering.

I am writing to you as my area of interest lies in your area of expertise, *Structural Optimization*. I also worked on a research project in Deakin University, Australia on *Optimization of Modular structures*.

Having gone through your works, I feel working under you would be a great opportunity for me to expand my research horizons and explore. I wish to know more about your current research works and would be happy to discuss about it.

I would also be happy to send over my undergrad thesis for your review.

Hoping to meet you this Fall.

Best regards,

Monica.
Hey,

Just wanted to make sure you have heard about this conference, organized by and for graduate student at USC Annenberg; it will be held there on October 4 - the topic of the conference this year sounds really interesting and important - challenging existing canons of communication from critical perspectives (which continues the ongoing conversation about why our field is so White). I would love to participate in this thing, but I feel like my work engages in a conversation with other canons, which are also very White but do not necessarily derive from communication studies. I don't know, I need to think about this. They only request a 300 words abstract, so I might consider putting something together. Regardless, given the work that all of us are doing, I think that other students of yours could also make good use of this conference.

Let me know if you have any thoughts/comments

Yuval
You always have a choice. It's simple: you either do what I tell you to do... or you give up, drop out, and become a failure and a disappointment in the eyes of your friends and family.

Is there a third option? Maybe. Maybe not. I'm not telling.
Navigating cultural differences

Be mindful of cultural differences

- Language barriers
- Forms of interaction
- Let your advisor know!
It has been a year since Josh and Ann joined the PhD program. They met at an annual school event after a long time and decided to grab lunch together. Over an hour, small talk turned into more meaningful conversations.

Ann: "My advisor is great. He lets me run with my own ideas, decide when to do what, and gives great feedback when I am stuck. He is so supportive of everything that I want to do."

Josh: "Wow.. I’m glad it is going so well for you."

Ann: "How has it been for you so far?"

Josh: "Well.. The projects I am working on are all my advisor’s ideas. I have very clear tasks and deadlines. It gets stressful at times but I guess I like it that way. Helps me get stuff done."

Ann: "It’s good if that works for you. But that would never work for me. Touchwood!"

Days after the lunch, Josh starts spiraling into thoughts of self-pity like he was missing something in life.. “why am I here?”... “what am I doing with my life?”...
Scenario #2

Olivia is a student from South Korea who is pursuing her master’s degree. Her mother at home who has fought lung cancer always wished for Olivia to receive her degree in the U.S. However, three weeks before the end of the first semester, Olivia receives terrible news that her mother’s condition has worsened.
What should I do?

- Be proactive. Talk about your challenges sooner rather than later.

- Avoid feelings of isolation
  - Join student clubs or social events
  - Seek peer support: UMCSSA, ISA, etc.
  - Use on-campus resources
Further resources

✓ IC orientation workshops
  o Writing Effective Email
  o Stress Less for Success
  o Making Friends in the US
  o Creating your Elevator Pitch
